STATE OF NEW YORK  
DEPARTMENT OF FARMS & MARKETS  
ALBANY, N. Y.

December 22, 1921.

To the Board of Supervisors of Putnam County,  
Kent Cliffs, N. Y.

Attention: Edmund D. Foshay, Clerk.

Gentlemen:

In accordance with the duties imposed upon me by Section 12, Article A, of the Agricultural law, I have caused to be inspected the Almshouse farm of your County. This inspection was made on December 15, 1921.

As a result of this inspection and a study of the facts covering the farm land connected with your Almshouse farm, I wish to make the following report and recommendations:

I find a 5-year rotation practised on this farm and would recommend that you use at least one ton ground limestone per acre when seeding down, and 16% acid phosphate on the grain crop.

It would appear that a larger dairy herd would be a desirable change in your farm management, and I would recommend that a silo be built for more efficient management of the dairy end. I would recommend the weighing of each cow's milk daily and keeping records of same; also the home mixing of the dairy rations. Am sending literature and blanks upon these subjects.

I think it would be advisable to keep some brood sows on this farm, raising the pigs rather than buying them, and that the swine be pastured on sowed crops such as rye, peas and oats or clover.

Tools and implements were well cared for and housed, and the farm stock show commendable care.

This report, together with my recommendations, is forwarded to you at this time in order that it may receive your attention and consideration at the present session of your Board of Supervisors.

Yours very truly,

BERNE A. PYRKE,

Commissioner of Farms and Markets.

COMMISSION OF HIGHWAYS  
ALBANY, N. Y.

November 2, 1922.

Mr. E. D. Foshay,  
Clerk, Board of Supervisors,  
Kent Cliffs, N. Y.

Dear Sir:

I am transmitting to you through Judge Southard, preliminary resolutions covering the two highways which are indicated for improvement on the Hewitt map as provided in chapter 18 of the laws of 1921 in Putnam County, which are not already covered by preliminary resolutions now on file in this office. These two resolutions should be passed by your Board in order that this department may be in a position to legally proceed with the preparation of plans for their construction as soon as they are reached in accordance with the designation passed by your Board of Supervisors. The passage of these resolutions in no way affects the order in which these highways are to be taken up, but is simply the necessary legal requirements which must be fulfilled before we proceed.

Very truly yours,

STATE COMMISSION OF HIGHWAYS,  
J. C. FINCH, Secretary.

STATE OF NEW YORK  
TAX DEPARTMENT  
ALBANY, N. Y.

October 26, 1922.

Board of Supervisors,  
Putnam County, N. Y.  
Gentlemen:

It will soon be your duty, pursuant to the provisions of section 50 of the tax law, to equalize the assessed valuations of the real property of the several tax districts of your county for the purpose of apportioning the state and county taxes. Among the duties of this commission prescribed by section 171 of the tax law is that of advising and assisting officials charged with duties relating to the assessment of property for taxation. The last mentioned section also makes it the duty of the commission to equalize the full value of special franchises with other real property in the town, city or village in which the special franchises are situated.

In the performance of this duty, the commission has caused an investigation to be made in each tax district of Putnam County for the purpose of determining the rate of assessment of real property situated therein, and has in its files a list of sales of real property in each tax district showing the sale price and the assessed valuation in relation to each sale. Based upon this list of sales and such other information as the commission has been able to gather, the rate of assessment of real property for each tax district of Putnam County has been fixed and determined by the commission for the year 1922 as follows:

Town of Carmel .....	70%	Town of Phillipstown .....	45%
Kent .....	70%	Putnam Valley .....	53%
Patterson .....	80%	Southeast .....	75%

This information is furnished for your consideration in making the county equalization this year with the hope that it may prove to be of assistance in your work. If you should desire to examine the list of sales, the commission will be glad to arrange for you to do so.

It should be borne in mind that the rates as set forth above are based upon the assessed valuations of the respective tax districts for the year 1921 and do not reflect any changes which may have been made in the assessed valuations for the current year. If any substantial changes were made in any of the tax districts for the year 1922, they should, of course, be given due consideration and the rate modified accordingly.

This communication is sent to you in the spirit of co-operation, the commission realizing that it is often difficult for the Board of Supervisors to obtain information in relation to equalization matters of the character herein referred to.

Very truly yours,

STATE TAX COMMISSION,  
SETH T. COLE, Deputy Commissioner.

November 18, 1922.

Board of Supervisors of Putnam County,  
Brewster, N. Y.

Attention: Mr. Oscar Bailey, Clerk.

Dear Sirs:

In accordance with the duties imposed upon me by Article 23, Section 285, of the Farms and Markets Law, I have caused the Putnam County Almshouse farm to be inspected. I wish to offer the following report and recommendations:

The dairy herd, consisting of 40 head of cattle, has not been tuberculin tested and milk is not pasteurized. I recommend that tuberculin test be made. The dairy barn is in a clean condition, and cattle have the appearance of being well cared for.

Last year I recommended that a silo be built. I wish to offer this for your consideration again at this time.

Good crops have been produced and well cared for. I am pleased to report that Mr. Wixom is very much interested in the work, and consider him a good farmer and manager.

Very truly yours,  
BERNE A. PYRKE,  
Commissioner of Farms & Markets.

Totals .....	29	26

---

Since the last inspection there has been 21 admissions, 13 discharges, and 6 deaths.

The bed capacity is 40 or more.

The ages of the inmates are said to range from 47 to 88.

The ages are not given in the Almshouse Register, and this record is not renewed annually, as it should be. The latest entry in the State Board Record was 1165, dated October 18, 1922.

One man and one woman are blind. There are no feeble-minded, epileptics or deaf-mutes. All but one man and two women are able to get about.

## V. GENERAL PLANT CONDITIONS

The almshouse is an old frame structure. The exterior is well painted. The interior is in fair condition, but the floors are badly worn. The plaster breaks frequently. Whitewashing produces a clean but bare and cold appearance, and makes dust. Inmates' rooms are not attractive, but floors, walls and beds are clean and neat. The men's only sitting room is very small, is usually crowded with men, and the chairs are hard and uncomfortable. There are no verandas for inmates.

The greatest shortcoming is the absence of hospital facilities and of any special accommodations, equipment or comforts for the sick or afflicted. One small room on the first floor is available for men who are not able to climb to and from the third floor.

All of the other men are on the third floor.

Working equipment is adequate for a small institution except that no power laundry equipment is provided. A small electric washer and mangle should be procured.

The main building is a three-story frame structure. A good fire escape is located at each end, and interior wooden stairs at one end. There is a stand-pipe near each end, with good hose, attached at each floor. There are also outside hydrants and rubber lined hose. Water pressure is very high. There are a dozen liquid chemical extinguishers. Arrangements have been made for their re-charging. There are also some powder tubes.

The site is healthful and attractive. Outbuildings are of good appearance. Farm buildings are not first class. The farm is large but not highly developed. There are about two hundred acres in the property.

A brook passing within 150 feet of the buildings is patrolled for the protection of the New York City water supply.

## VI. GENERAL ADMINISTRATIVE CONDITIONS

Superintendent—Russell B. Wixom .....	\$600
Matron—Miss Cynthia Wixom .....	300
Inmates' Cook—James Graham .....	20 a month
Farm Hand—Vincent Barrett .....	15 "
Farm Hand—Charles Skedgule .....	15 "

The cook was absent, and his return was not certain. An inmate was doing the cooking.

Additional help is employed as needed for cleaning, etc., at \$2.00 a day.

The attending physician is Dr. McKown, of Carmel. He comes only on call. He leaves a record of his visits and of patients treated, and is said to see all of the inmates. The record shows three visits in April, two visits a month from May to September inclusive, three in October, and one so far in November, though he was said to have come three or four times.

Whatever nursing is done is provided by other inmates or the employees. Outside hospitals are not being availed of frequently. It was said that one patient had been taken to a hospital since the last inspection and one the previous year.

At the time of inspection, one man partially paralyzed, was confined to his bed in the room on the first floor. A commode chair is the only convenience. It is said that an unsuccessful effort was made to get this man into a hospital.

There were no acute cases. Two women were getting eggs for breakfast, and one man had special dinners brought for two days; she was not sick but her appetite was poor. Extras for the sick are prepared by the Matron. A dumbwaiter facilitates the serving of the woman on the second floor.

The inmate who was acting as cook had the help of two other inmates. The meals served on the day of inspection were:

Breakfast: Fried salt pork and potato, bread, butter, coffee.

Dinner: Boiled salt pork, boiled potato, bread, butter, tea.

Supper: Rolled oats, whole milk, tea for some women.

Suppers are varied by three cereals, and crackers on Sunday. Breakfasts are the same every day, except that beef or lamb are sometimes provided.

Some recent dinners, besides potato, bread, butter and tea, included the following:

Tuesday: head cheese.

Friday: pork and cabbage.

Wednesday: lamb.

Saturday: beef.

Thursday: pork and beans.

Sunday: salt pork.

Vegetables were said to be abundant but the inmate cook and his helpers disliked to prepare them. Prunes were said to have been served frequently in the spring, and apple sauce would probably soon be provided often, depending upon the return of the regular cook. The meals being served contain salt pork too frequently, although this pork was said to be new, and almost like fresh pork. Extra vegetables should be included in all dinners, and fruit in suppers several times a week.

Butter is always served at breakfast and dinner. Special dinners are provided on holidays. Desserts are not provided at any other times. Local societies do much for the inmates at Thanksgiving and Christmas.

As to cleanliness, conditions were very good. Sheets are not ironed, but are folded smoothly. Beds were comfortable and were found clean, neat, and free from vermin. Fly specks were noticeable in the men's dining room.

Weekly baths and changes are the rule. Underwear is used individually. Toilet, bath, and lavatory facilities are adequate and in good condition. The outside toilet is the only objectionable feature. Air space is adequate.

Religious services are held once a month.

Much of the Farm is used for pasturage. Of the 34 head of cattle only four are milch cows, the main profit coming from the sale of young cows. Some of the butter used is made here and the rest is bought. There were four horses, six hogs, and over one hundred hens.

## VII. SUMMARY OF PRINCIPAL NEEDS AND DEFECTS.

1. The building is poorly adapted to the care of inmates, especially the sick and infirm, and the floor and walls are in poor condition. (New floors planned.)
2. A good cook and a nurse are needed.

Respectfully submitted,

(Signed) W. L. CHASE,

Inspector.

## ANNUAL REPORT OF THE COUNTY SUPERINTENDENT OF HIGHWAYS

For the County of Putnam for the Year Ending December 31, 1922.

Before the frost was fairly out of the ground the County was visited by a heavy and warm rainfall which washed and gullied the earth roads frightfully. In some of the towns a goodly portion of the funds appropriated for the year's requirements was used in repairing the damages. Then after the usual spring work of ditching and crowning was completed, there was another deluge, demolishing that effort. Therefore, the Town Superintendents were severely handicapped, and to put the roads in ordinary good condition some of the towns were obliged to raise funds on certificates of indebtedness. However, under these unusual conditions, the year past was accompanied by very little complaint, reflecting credit to the local officials having the work in charge.

The Town of Putnam Valley has purchased a stone crusher and bins, air compressor, drills, etc., and is equipped for permanent road building. This fall a steam roller was leased and the Town Superintendent has built approximately 3,000 feet of permanent stone road, extending the improved project on the highway leading from Oregon to Oscawana.

The 70' steel truss bridge spanning the East Branch of the Croton River in the Town of Southeast has been reinforced, the work being done by the United Steel Construction Co. This bridge was closed to the public for about nine months, during which time the Town Board had under consideration the building of a new structure. The State Department made preliminary plans for a concrete arch and later perfected a plan for a bridge of concrete covered eye-beam construction. In the meantime the Board contracted to have the old bridge reinforced. Twin 3' concrete pipe were placed in the bed of Tonetta Brook on highway 909, the 12' throat filled with stone, the ends faced with loose masonry walls, and the road surface macadamed thus eliminating a bridge and making a permanent roadway.

The Board of Supervisors have placed the County of Putnam in the County Aid System under Sec. 320b, and next year there will be available \$30,540 for improved town roads.

Explanations or remarks in regard to above matters:

In this County, the chief industry of which is milk production, it is interesting to note here one instance where slightly worn weights being used on a scale for weighing raw milk as brought to the dairy plant by the farmers, were replaced immediately with the correct weights by order of the sealer, and further investigation showed that the dairymen's milk checks had increased after the use of the new weights. The aggregate amount of increase in the checks of all supplying the dairy plant amounted to a fair sized sum.

### EXPLANATIONS AND REMARKS IN REGARD TO ABOVE

Wagon scales above shown as 12 correct and sealed is only partly true. the twelve tested correctly but only four were sealed as the remainder has loose balance balls and in each case the owner was instructed to repair this feature. those with loose balance balls were not sealed.

The nine platform scales noted as incorrect were those having loose balance balls and similar instructions were given. A decided improvement in this condition was found in inspections made this year over last.

Counter scales held out good under the test this year, a few slight adjustments were made and directions were issued to have a few slow acting ones cleaned.

Spring balances showed up equally good this year. New scales were found in place of old ones in some instances while a few were found that had become inaccurate since last year.

Several new computing scales were found this year in place of other kinds used previously, and as a rule were in excellent condition. A few slight adjustments were made. Meat dealers particularly, were cautioned to keep the plate on this type clean to prevent it from becoming fast, due to an accumulation of grease.

Counter tacks in many cases have remained in their present places for over a quarter of a century and the two found incorrect were new ones. These evidently had but little use and were corrected by the Sealer.

The tape mentioned was tested for the State Police and was used in a murder case. A steel tape was recommended.

Liquid measure showed great improvement this year over last year. A few short ones were found, most of these being caused by dents. Dealers as a rule were much better equipped with good liquid measures than during last year's inspections.

Several new oil pumps were installed in the county this year and a wide variation in accuracy was found on a few, running as high as 30 cu. in. over on the 5 gallon throw to 30 cu. in. under. All of these were adjusted where possible and where it was impossible the pump was condemned and either repaired by the oil company or a new one installed. The 26 pumps listed above as incorrect also include those which showed a shortage that was within the tolerance.

Avoirdupois weights showed a higher percentage of correctness this year than last, although there were more of them under weight than the Sealer expected. Some scales on which weights had been used had been replaced with new computing scales.

## GENERAL

1. Are all the weighing and measuring devices used within your city or county such as comply with the State specifications? (Attention is called to balance balls and adjusting screws, separate scoops and counter rings on scales, charts, etc., on computing scales, illegal sized or shaped measures, incorrect and large counter tacks, incorrectly graduated bottles, etc.). They comply with the exception of the 69 platform and wagon scales of which 17 had loose balance balls and one loose scoop weight was found. Correction of these was requested.

2. Have you tested every weighing and measuring device used in your county or city twice this year? Yes.

3. How many hardware stores are in the county or city under your jurisdiction? Four. How many of these have you visited and tested the scales, weights and measures there offered for sale? All. Have you advised all the hardware dealers to purchase only such weighing and measuring devices as comply with the State standards? Yes.

4. Have you been called upon by your county or city authorities to weigh and check the supplies that are purchased by the county or city for institutions deriving support from your county or city? No. If not, have you called the attention of your county or city authorities to the necessity for the same? No. Have you made such tests on your own initiative and to what extent? No.

5. What are the conditions within your jurisdiction in regard to sale of gasoline? Practically all sold from automatic pumps and only a few showed wide variations over and under.

6. What are the conditions within your jurisdiction in regard to dealers in coal, etc.? During shortage, deliveries have been in smaller quantities including bags and fairly good accuracy has prevailed. One re-weighing showed an excess of 1,650 lbs. because of wrong method of weighing. Dealer ordered to discontinue that method.

7. What are the conditions within your jurisdiction in regard to Hay? Feed dealers sell some hay in bales and tags were found on inspection. Very little hay baled here but inspection found it properly weighed and tagged.

8. What have you done to educate dealers and consumers in regard to matters relating to weights and measures? Called their attention to various sections of the law and left with them copies of these laws.

To the best of my knowledge all weighing and measuring devices have been thoroughly inspected and tested twice this year, with the exception of course of some new ones which were installed during the latter half of the year.

Re-weighing of coal during the prevailing shortage revealed the amusing case that one dealer had billed out a truck load of coal, and upon re-weighing by the Sealer was found to be 1,650 lbs. more than had been charged on the slip. This was caused by an improper method of weighing, the truck and coal being over the capacity of the scale and the dealer first weighed the front end and then the rear end, the rear or front wheels being over on the ground and off the scale at each time respectively. This method was ordered discontinued.

### PUTNAM COUNTY JAIL

Carmel, N. Y.

Inspected October 18, 1922. Wallace T. Secord, Sheriff. Mrs. Secord acts as Matron; a Jailor is still employed.

The population at the time of inspection was 4, all adult males classified as follows: serving sentence, 2; held for grand jury, 1; awaiting trial, 1. The greatest number at any time since January 1, 1922, was 27; the lowest, 0, and the average about 5.

This jail is a two-story and basement stone and brick building adjoining the rear of the court house. On the first floor there are three departments, one of five cells, one of three, and another consisting of a large corridor with four bunks, in addition to two cells, one of which is padded. On the second floor are four large rooms, each furnished with four bunks. These rooms are used mainly for minors and any females who may be detained. A large room in the basement for the use of lodgers is equipped with bunks, toilet, shower, and lavatory.

In each cell and the aforementioned corridor downstairs are a niche toilet and enameled iron lavatory. A shower bath is located in each department. Each room on the ground floor is equipped with a toilet, and there is a shower in two of the rooms.

The cells are furnished with two steel bunks with mattresses, pillows with slips, sheets, and blankets. New bedding is supplied each inmate on arrival and he is obliged to wash it weekly thereafter.

There is no employment for prisoners except janitor work about the jail.

Inmates receive three meals a day, the food being prepared by the matron. The menu is substantially as follows: Breakfast—bread and coffee; dinner—meat, potatoes, vegetables, bread, coffee; supper—bread and tea. Prisoners interviewed stated that the food was of good quality and the ration ample.

A jail physician is appointed as required by law and visits the jail when called, but he does not examine prisoners on admission as is now done in many of the county jails with satisfactory results. Under ordinary circumstances one of the rooms on the second floor could be set aside as a receiving room where prisoners could bathe and be examined by the physician and any found suffering from communicable diseases could be segregated.

I was informed that the grand jury now meets four times a year instead of two as was formerly the case. This remedies a condition which had been criticized by the Commission for several years, namely, detaining prisoners awaiting action by the grand jury for such long periods in a small jail with practically no opportunity for exercise.

The interior of the jail was being painted at the time of inspection, the walls with gray and the steel work with aluminum bronze. The work was being done by inmates and the appearance of the jail was much improved.

The rusted niche toilets, so frequently criticized in the past, have not been replaced. Vitreous toilets should be provided, at least for the cells which are most used.

The laundry work is still done in the cell corridor. This practice has been criticized and the Sheriff stated that he was endeavoring to obtain a hand power washer so that all of the work could be done in the basement of the jail. This would be commendable, but the installation of an electric washer large enough to care for the work of the jail could be installed for a reasonable sum.

The jail was clean and in good order.

### RECOMMENDATIONS

1. That prisoners be examined by the physician on admission and any found suffering from communicable diseases be segregated.
2. That the practice of doing laundry work in the jail corridors be discontinued and suitable laundry facilities be installed.
3. That the rusted niche toilets be replaced with vitreous toilets of a type approved by the Commission.

Respectfully submitted,

JAMES McC. SHILLINGLAW,

Inspector.
